

Reliable Source for Performance Herefords!

April 4, 2014 - 1 p.m.

Selling 100 Bulls and 30 Proven Females

**Also Selling 65 Commercial Hereford
and Black Baldie Open Heifers**

Visit sandhillfarms.com or call (620)995-4072 for information on
sale cattle and videos of the sale bulls.

Real World Proof!

Kevin,

About a month ago we ultrasounded the first group of Len 502R FR-1 Braford calves (6 months of age).

We were only looking for IMF— too small for ribeye size yet. Average IMF was 5.75% and ranged from 4.73 to 6.24! This is from natural service calves. Some of the Brahman females were ones that we didn't have carcass data on so we weren't sure how he would do on them.

Looks like he definitely is passing on the IMF to his calves.

We are planning to make a lot more F-1s with this great bull.

Hope you and your family are doing well. We'll try and make your next sale.

RoyLee & Angela Herbert

Choctaw Cattle Company

Sunset, Louisiana

Repeat Buyer Credit Policy

We offer a "repeat buyer credit policy". If you purchased a registered animal from us in last years sale, you will receive 5% off your total purchase in this years' sale.

This policy will be ongoing and will apply to next years sale. The discount is determined after all credits have been subtracted from the gross purchase price.

www.sandhillfarms.com

Hello Cattlemen,

As you know, feeder cattle prices are at an all time high. To some, however, profits are still tough to hang onto. In your cow herd, if you don't have the traits bred into them that will allow you to market more pounds of a quality product, you still don't have all the profits you could be earning. From the time we started breeding cattle, we have been concentrating on producing a product that will enhance your profit potential. Below you will see an EPD chart for the average of the 100+ bulls in this year's sale. Below that, you will see a comparison of the 50 bulls we had in our first sale in 2008.

2014 Sale Bull Average EPD and National Rank

| CE | CEM | BW | WW | MM | M&G | YW | SC | IMF | REA | FAT | BMS | CEZS | BIIS | CHBS |
|--------------|------------|-------------|--------------|-----------|-------------|-------------|------------|------------|--------------|--------------|----------|------------|-----------|------------|

| CALVING EASE | | | | MARBLING | | | | GROWTH | | | | REA | | |
| 2014 | 3.59 | | | | .27 | | | | 84 | | | | .38 | |
| 2008 | .49 | | | | .14 | | | | 80 | | | | .38 | |

My point with this chart

We have improved Calving Ease and Marbling without sacrificing Growth or REA and we have more than doubled our numbers of bulls.

All the bulls in the sale have enhanced genomic EPDs, combined with all the data we can gather, giving you the most complete and powerful selection tools available to the cattle industry. This is the 5th year we have offered all our 5-year-old cows that have heifer calves at side. Over 80% of these cows have gone on to be donor cows for their new owners. This year's group will prove to be the deepest and highest quality we have offered. FYI, we use sexed heifer semen on these cows last spring and ended with a 70% AI conception. In addition to our 50 commercial Hereford heifers, we will again be offering 15 black baldie open heifers from the /EV Ranch near Rifle, Colo. These heifers are a product of bulls from Sandhill and Gardiner Angus. Please give us a call if we can answer any questions or assist you in any way. Sincerely, Kevin

Sandhill Farms Production Sale

Friday, April 4, 2014 • At the Ranch • 1 p.m. (CST)

2048 280th Ave. • Haviland, KS 67059

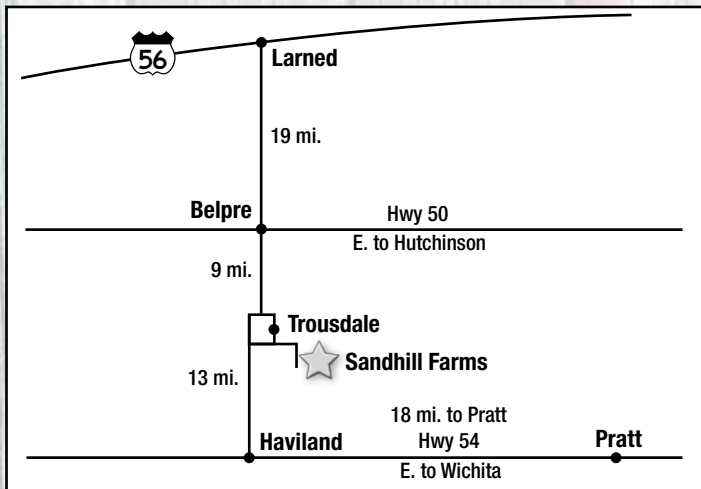

Kevin and Vera Schultz 620-995-4072 • Kevin cell 620-546-4570 • Vera cell 620-546-3982

Ron and Arnita Schultz 620-348-4863

www.sandhillfarms.com • kevin@sandhillfarms.com

Cattle will sell in lot order.

Located near Trousdale. See map.

Inspection of cattle: The cattle will be available for inspection any time prior to sale at Sandhill Farms.

Soup supper will be Thursday night. A complimentary lunch will be available on sale day along with donuts and coffee on Friday morning.

Note: Sandhill Farms reserves the right to a ¼ semen interest on all sale bulls with the exception of a ½ semen interest in Lots 1,2,3 and 4. These bulls will be marked.

Terms and Conditions

Delivery: Free delivery on bulls and cows within the U.S. \$75 off per bull you haul. No delivery on the heifers.

Guarantee: We guarantee that all breeding cattle, both females and bulls, are fertile to the best of our knowledge. If they are injured any time in the 12 months after they are purchased so as to make them functionally infertile, we will provide you with a satisfactory replacement, if available, or issue you credit equal to your purchase minus salvage value.

Sight Unseen Guarantee: Just like when we sold bulls private treaty, we will guarantee your satisfaction of the bulls we purchase for you. If you don't feel like the bull was represented accurately after he has been at your place, let us know and all you will pay is the trucking. We will take the bull back. You must talk to us at Sandhill Farms so we can help match you up with the best bulls for you prior to the sale.

Health: All bulls have been fertility tested by Dr. Mike Burdett of Larned Veterinary Clinic and passed. They were also vaccinated with Staybred VL5 and poured with ivermectin. All cattle have been tested negative for PI BVD. At weaning, the bulls and heifers were vaccinated and boosted with Bovishield Gold 5,

Special Comments

Levi Landers with the American Hereford Association has seen all the cattle. They can take phone bids or advise about the cattle.

Inclement weather: check our Web site www.sandhillfarms.com for weather postponements.

Accommodations

Pratt, 30 miles southeast from Sandhill Farms

Days Inn ----- 620-672-9465

Holiday Inn Express ----- 620-508-6350

Larned, 30 miles north of Sandhill Farms

Best Western ----- 620-285-3114

Rodeway Inn----- 620-285-2300

Air Travel

Wichita is located 100 miles east of Sandhill Farms and is served by major airline carriers. Dodge City is located 60 miles west of Sandhill Farms and is a regional airport.

Preresponse SQ and Vision 7. The heifers were vaccinated with Bovishield Gold FP 5 VL5 and poured with ivermectin. Herd health is excellent. Individual health papers will be provided for shipment anywhere.

Bull Development: The bulls were creep fed on grass in late summer. After weaning, they have been grazing on wheat or annual rye pasture when available. Silage and 8 lb. of grain have also been fed.

Announcements: Check our Web site for updated information at www.sandhillfarms.com.

Liability: Any person attending the sale does so at his own risk. The sale management, owners nor any person connected with this sale do not assume any liability, legal or otherwise.

Registrations/Transfers: Registration certificates will be transferred to the buyer upon request at the seller's expense. When making settlement, buyers must give complete written name and address.

Insurance: Insurance will be available sale day for those wishing to purchase it. Please tell the clerk when settling up.
Sheila Jensen, Livestock Insurance Agent 785-374-4372.

Glossary of Performance Terms

We are going to give you all the data we can gather and let you decide which bulls will fit in your program the best.

- **Expected Progeny Difference (EPD)** — The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed from the same database. EPDs are expressed in units of measure for the trait, plus or minus. EPDs are not to be compared between breeds.
- **ACC** — Accuracy is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability.
- **Birth wt.** — The actual weight in pounds at birth.
- **CE** — Calving-Ease Score: 1= unassisted; 2= some assistance; 3=mechanical assistance.
- **Adj. WW** — Weaning weight adjusted to 205-days of age and adjusted for age of dam.
- **Adj. YW** — Yearling weight adjusted to 365-days of age and adjusted for age of dam.
- **Weight Ratio** — A direct comparison of one calf to all other calves in his contemporary group. 105 means that the calf performed 5% above group average for that trait and a 95 ratio indicates that the calf is 5% below group average for that trait.
- **Contemporary Group** — A group of cattle about the same age and given equal treatment.

Growth EPDs

- **Birth Wt. EPD (BW)** — Birth weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- **Weaning Wt. EPD (WW)** — Weaning weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- **Yearling Wt. EPD (YW)** — Yearling weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- **Scrotal Circumference (SC)** — Expressed in centimeters, this is a predictor of the difference in transmitting scrotal size compared to other animals from the same breed or database.

Maternal EPDs

- **Maternal Milk (MM)** — A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires.
- **Milk & Growth (M&G)** — A predictor of a sire's daughters for milk and growth. In other words, it is that part of a calf's weaning weight attributed to milk and genetics for growth.

Carcass EPDs

- **Back Fat (Fat)** — A predictor of the difference in external fat thickness at the 12th rib.
- **Rib Eye Area (REA)** — A predictor of the difference in ribeye area.
- **Marbling (MARB)** — A predictor of the difference in intramuscular fat.

Breed Indexes

- **Baldy Maternal Index (BMI)** — Combination of weighted traits that affect the bottom line when mating the Hereford bull on black cows.
- **Calving Ease Index (CEZ)** — Animal's potential for use on heifers.
- **Brahman Influence Index (BI)** — Similar to BMI index, but weighted heavier for traits that will make Brahman cattle more profitable.
- **Certified Hereford Beef Index (CHB)** — Animal's ability to perform in the feedlot and on the rail.

Ultrasound Adjusted Measurements

- **Adj. % MARB** — The percent intramuscular fat (marbling) adjusted to 365-days of age. Heritability for marbling is in the moderate range. The intramuscular fat in longissimus muscle of ribbed carcasses is the principal determinant of USDA quality grade in cattle slaughtered at less than 30-months of age. Heifers and steers in the 4% range of MARB will be close to making the Choice grade. Bulls if they were steers with a 3% MARB will also be close to the Choice grade. The difference is the influence of testosterone in the bulls' system.
- **Adj. REA** — Each bull's ribeye area measured in square inches and adjusted to one year of age. REA is used in the calculation of yield grade.
- **Adj. Backfat** — This is the backfat measured in inches adjusted to 365-days of age. The BF thickness is directly related to the carcass yield grade.
- **Rib Eye/ cwt.** — This is the adjusted REA divided by the hundred weight of the bull. The weight of the animal, which is affected by fill, body condition and others, can change this ratio greatly.

Dam's and/or Progeny Production Records

- **Birth Weight Ratio (BWR)** — The number of calves a dam has had and their average birth wt. ratio. Example: 2-98 means the dam has had 2 calves with an average BWR of 98.
- **Weaning Weight Ratio (WWR)** — The number of calves a dam has had and their average weaning weight ratio. Example: 2-102 means the dam has had 2 calves with an average WWR of 102.
- **Yearling Weight Ratio (YWR)** — The number of calves a dam has had and their average yearling weight ratio. Example: 2-103 means the dam has had 2 calves with an average YWR of 103.
- **Marbling Ratio (MARBR)** — The number of calves a dam has had and their average wt. ratio. Example: 2-98 means the dam has had 2 calves with an average MARB of 98.
- **Rib Eye Ratio (REAR)** — The number of calves a dam has had and their average ratio. Example: 2-102 means the dam has had 2 calves with an average REA of 102.
- **Fat Ratio (FATR)** — The number of calves a dam has had and their average ratio. Example: 2-103 means the dam has had 2 calves with an average FAT of 103.
- **DOB: Date of birth**
- **H/P/S/D:** — Horned/Polled/Scurred/Dehorned

- Progress is a superior calving ease sire that will enhance IMF in any breed of cattle.
- In the Circle A Test, Progress had a higher marbling score than the comparative Angus sires.
- Many breeders have bid a lot of money for daughters of Progress.
- Selling six sons in the sale.
- Semen available from ABS.
- Progress ranks in the top 20 of the breed for the newest Hereford EPDs.

All of the lots in the sale will also be available for viewing online prior to sale day at *www.superiorlivestock.com and www.sandhillfarms.com*

***We realize that Calving Ease is one of the most valuable traits during calving season.
We guarantee all of these bulls to your satisfaction. Period.***

- Andre is a real neat genetic package. Super thick, big REA, then realize this big butted bull has the highest IMF score of the entire offering. His genomic EPDs indicate he is in the top 1% of the breed for that trait. We have flushed his grandam, 1T several times and will continue to have this cow family in our program.

Lot 9 — SHF Alarm Y90 A193

- Access is a dark red son of Literal. I really liked this bull all year, then he ratioed 106 on IMF and 115 on REA. Big scrotal with a super spread from birth to weaning. Then check out his dam... super attractive and feminine.

- Ally is in the top 4% of the breed for calving ease, top 1% of the breed for WW. How could you ask for a better combination? OK, then look at the bottom of his pedigree. 8M, the dam of Ribeye, is there. Good and solid.

- Adrian has one of the top calving ease EPDs in the sale. Additionally, ratioed 120 for IMF and that puts him in the top 1% of the breed. His dam sold in the sale last year to Crittenden Bros. in Canada. I believe they paid for her in less than a year in embryo sales. When someone makes a profit on our genetics that makes us very proud.

- Advil is medicine for breeders that don't have enough profit in their calf crop. The dam of Advil is consistent and complete. We have tried her with many different matings and the calves are always full of growth and performance.

- We bought the right to flush the dam of Apley from Walker Polled Herefords in Tennessee. She later sold for \$30,000. The combination of Wonder and 7115 will make some great music called the profit song.

- This Logic son is out of another full sister to Wonder. We have used Logic on our virgin heifers with super success. Notice the top end growth of 66 for WW and 108 for YW. This puts Austin in the top 1% of the breed for growth. Dam sells as Lot 109.

- Agria is a full brother to Lots 51 and 91. We have full sisters in production and they are really nice. It is my opinion that the daughters of Tug are most often better uddered than their dams. Add the dam of Agria, U16, in there and it only gets better.

- First off, notice the top 2% of the breed for calving ease. Then take in the spread up to 88 for YW. This is a real nice combination, folks. Alden is a natural son of U75. We flushed U75 due to her udder quality and carcass merit.

- Anthony is another of the many Logic sons in the sale. He is thick topped and will sire some moderate framed performance cattle.

A few notes about the registered cows selling.

- We are selling all the 5-year-old cows that have been ultrasound checked to be carrying a heifer calf.
- I feel we can offer a no-holes, predictable female package with many future productive years.

The thinking behind this program is:

1. We will be keeping all of our registered heifer calves, thus we can turn our generations faster in the cow herd.
2. We will have time to identify the donors, flush embryos and use the genetics from these cows for our future, then offer them to you.
3. By selling cows with heifer calves, we can have some stability in our cow herd and gather data on the bulls for the following year's sale.
4. We will identify the bottom end of the cows and cull for any reason necessary.
5. These cows will sell with complete performance and ultrasound records.
6. We will be giving you the opportunity to purchase the very top end of these young cows.

- W37 is a daughter of M326. Her mother, N113, had a calf steered due to an injury. That steer was the first prime YG2 we ever produced. Now, notice the IMF ratio of W37's calves. This is what genetics can do for you.
- Pasture bred to Loewen Foundation 34X. At time of preg check, it was too early to determine the sex of the calf. W37 will sell regardless of sex of the calf.

- This daughter of Puckster has a super EPD spread. She ranks in the top 10% of the breed for BW and in the top 2% for both WW and YW. Notice also she has a 108 YW ratio. Grandam is L37, the dam of Wonder.
- Pasture bred to Loewen Foundation 34X. At time of preg check it was too early to determine the sex of the calf. W03 will sell regardless of sex of the calf.

Real World Proof!

Hereford-Sired Replacement Average \$529 More Than Angus-Sired

Real-world research utilizing Hereford bulls has led to documented real-world results in baldie female demand compared to straight-bred Angus females.

During the recent Circle A Ranch Sale Oct. 19, 29 black-baldie heifers averaged \$2,960, and the top-selling lot was black-baldie heifers bred with heifer-calf-confirmed pregnancies at \$3,450 each. The average price paid for the 269 straight-bred Angus heifers was \$2,431. That's a Hereford-sired advantage of \$529 per head in price.

In 2007 Circle A Ranch, Iberia, Mo., began a research project with the American Hereford Association (AHA) designed to determine and measure the advantages of using Hereford genetics on commercial Angus cows.

Results from the project documented the Hereford efficiency advantage with a 7% increase in conception rate along with improved feed efficiency and average daily gain. Utilizing the Circle A data, economist Vern Pierce developed an economic model which projected that over a 10-year period, using Hereford bulls on Angus-based females would add \$514 net over the life of a cow or approximately \$51 per cow per year to a rancher's bottom line.

Now, six years later, Circle A is still using Hereford genetics and having great success. Circle A's Nick Hammett says that since the completion of the research project, the ranch has purchased four Hereford bulls that it is utilizing natural service and collecting for artificial insemination.

The Hereford bulls are mated to Angus cows, and the resulting heifers are highly sought-after. Each fall Circle A Ranch offers bred replacement heifers in its production sale, and in recent years, the Hereford-sired heifers have been topping the sale.

Hammett says the Circle A Ranch staff plans to continue using Hereford bulls: "We will keep using Hereford genetics. If they keep selling like this, it's a win-win for us. We harvest all the steer progeny, and the F1 females sell really well."

SANDHILL FARMS COMMERCIAL HEIFERS

These commercial Hereford heifers are out of the heart of our commercial herd. Our commercial Hereford herd was started in the mid-1940s by my grandfather, Roy Schultz and continued by Dad, Ron Schultz.

We are happy to have a group of black baldie heifers from one of our long time customers, /EV Ranch from Rifle, Colorado. These are younger than ours, about 1 to 2 months, and were raised in the western edge of Colorado. The genetics in these heifers is a combination of SHF and GAR, Gardiner Angus Ranch, from Ashland.

/EV Ranch is a 70-year-old ranch in Northwestern Colorado near the town of Meeker and has been focused on raising the highest quality, commercially-bred black baldie replacement heifers since 1986. The ranch has 1,000 commercial cows and utilizes Sandhill Farms Hereford and Gardiner Angus.

Bulls with low BW, high growth and moderate frame EPDs. The ranch offers approximately 150 baldie replacements per year. The set of 15 present is a top sort of this 150 and additional heifers are available at the ranch via private treaty.

For more information, please contact Ty Schultz 425-749-1007.
