

Reliable Source for Performance Herefords!

**Sandhill
Farms**

*Unlock Their Future Potential
With Genetically Enhanced EPD's*

**April 3,
2015 - 1 p.m.**
Selling 108 Bulls and 25 Proven Females

**Also Selling 50 Commercial Hereford
and 15 Black Baldie
Open Heifers**

**Visit sandhillfarms.com or call (620)995-4072 for information on
sale cattle and videos of the sale bulls.**

Real World Proof!

Kevin,

At eleven months of age we sold our calf crop at the Pratt Livestock Market. The black baldie steers out of Sandhill Farms genetics weighed 863 while their black herdmates weighed 755. The black baldies were \$228.14 more valuable per head than their black herdmates.

We will see you at your sale again next year!

Jay and Amy Derley

Lewis, Kansas

Repeat Buyer Credit Policy

We offer a "repeat buyer credit policy". If you purchased a registered animal from us in last years sale, you will receive 5% off your total purchase in this years' sale.

This policy will be ongoing and will apply to next years sale. The discount is determined after all credits have been subtracted from the gross purchase price.

Kevin and Vera Schultz

 Ron and Arnita Schultz • 620-348-4863
www.sandhillfarms.com

Dear Friends,

It is indeed an honor to invite you to this year's Sandhill Production Sale. This is a wonderful time to be in the cattle business.

We here at SHF have been blessed again this past year. Brooke and Travis announced at Thanksgiving that they will be having their first child next summer. Tyler graduated from Kansas State last May and has joined us full time here at the ranch. Courtney is finishing her last semester at Kansas State in the spring.

The cattle we have sold in the past continue to impress upon us that we are on the right track with the breeding program. You have told us many times how the cattle purchased at SHF have helped you be successful at your ranch. With that, we are continually pushing to make the genetics better with each newborn calf.

The bulls we are offering are the best we have ever had. Calving Ease, Performance, Carcass Merit and Udder Quality, it is all here and it is all the best we've had to offer yet.

Average EPD on 2015 Sale Bulls and Percentage Rank!

CEM	CEM	BW	WW	M	MG	YW	SC	T	U	IMF	REA	FAT	BMI	CEZ	BII	CHB
3.8	3.64	1.26	53.4	21	47.6	86	1.3	1.24	1.3	.28	.30	.013	26	20	22.3	30
12%	10%	12%	25%	45%	40%	25%	5%	20%	10%	3%	45%	70%	3%	5%	5%	7%

The cows in the sale will have heifers at side with the exception of the last five head. The service bull had an injury and these cows didn't get bred last summer. So, we have exposed them to SHF All Star and they will sell as fall bred cows.

The commercial open Hereford and black baldie heifers will be the same excellent quality we have offered in the past. They are vaccinated, have been cycling and are ready for you to breed and turn out. It is an honor for our family to be your genetic provider; we take the responsibility seriously and will do as well as possible to provide you cattle that will help you achieve your goals and help you move forward in the industry.

Please call us anytime, and we will do our best to help you with any questions you might have.
 Sincerely,

Kevin and Tyler Schultz

Sandhill Farms Production Sale

Friday, April 3, 2015 • At the Ranch • 1 p.m. (CST)

2048 280th Ave. • Haviland, KS 67059

Kevin and Vera Schultz 620-995-4072 • Kevin cell 620-546-4570 • Tyler Cell 620-546-1574

Ron and Arnita Schultz 620-348-4863 • Vera cell 620-546-3982

www.sandhillfarms.com • kevin@sandhillfarms.com

Cattle will sell in lot order.

Located near Trousdale. See map.

Inspection of cattle: The cattle will be available for inspection any time prior to sale at Sandhill Farms.

Serving beef stew Thursday night. A complimentary lunch will be available on sale day along with donuts and coffee on Friday morning.

Note: Sandhill Farms reserves the right to a $\frac{1}{4}$ semen interest on all sale bulls with the exception of a $\frac{1}{2}$ semen interest in Lots 1,2,3,4,6 and 7. These bulls will be marked.

All of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com and www.sandhillfarms.com

Terms and Conditions

Delivery: Free delivery on registered bulls and cows to central points in the U.S. \$75 off per bull you haul. No delivery on the heifers.

Guarantee: We guarantee that all breeding cattle, both females and bulls, are fertile to the best of our knowledge. If they are injured any time in the 12 months after they are purchased so as to make them functionally infertile, we will provide you with a satisfactory replacement, if available, or issue you credit equal to your purchase minus salvage value.

Sight Unseen Guarantee: Just like when we sold bulls private treaty, we will guarantee your satisfaction of the bulls we purchase for you. If you don't feel like the bull was represented accurately after he has been at your place, let us know and all you will pay is the trucking. We will take the bull back. You must talk to us at Sandhill Farms so we can help match you up with the best bulls for you prior to the sale.

Health: All bulls have been fertility tested by Dr. Mike Burdett of Larned Veterinary Clinic and passed. They were also vaccinated with Staybred VL5 and poured with ivermectin. All cattle have been tested negative for PI BVD. At weaning, the bulls and heifers were vaccinated and boosted with Bovishield Gold 5,

Special Comments

Levi Landers with the American Hereford Association has seen all the cattle. They can take phone bids or advise about the cattle.

Inclement weather: check our Web site www.sandhillfarms.com for weather postponements.

Accommodations

Pratt, 30 miles southeast from Sandhill Farms

Days Inn ----- 620-672-9465

Holiday Inn Express ----- 620-508-6350

Larned, 30 miles north of Sandhill Farms

Best Western ----- 620-285-3114

Rodeway Inn----- 620-285-2300

Air Travel

Wichita is located 100 miles east of Sandhill Farms and is served by major airline carriers. Dodge City is located 60 miles west of Sandhill Farms and is a regional airport.

Preresponse SQ and Vision 7. The heifers were vaccinated with Bovishield Gold FP 5 VL5 and poured with ivermectin. Herd health is excellent. Individual health papers will be provided for shipment anywhere.

Bull Development: The bulls were creep fed on grass in late summer. After weaning, they have been grazing on wheat or annual rye pasture when available. Silage and 8 lb. of grain have also been fed.

Announcements: Check our Web site for updated information at www.sandhillfarms.com.

Liability: Any person attending the sale does so at his own risk. The sale management, owners nor any person connected with this sale do not assume any liability, legal or otherwise.

Registrations/Transfers: Registration certificates will be transferred to the buyer upon request at the seller's expense. When making settlement, buyers must give complete written name and address.

Insurance: Insurance will be available sale day for those wishing to purchase it. Please tell the clerk when settling up.
Sheila Jensen, Livestock Insurance Agent 785-374-4372.

Glossary of Performance Terms

We are going to give you all the data we can gather and let you decide which bulls will fit in your program the best.

- Expected Progeny Difference (EPD) — The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed from the same database. EPDs are expressed in units of measure for the trait, plus or minus. EPDs are not to be compared between breeds.
- ACC — Accuracy is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability.
- Birth wt. — The actual weight in pounds at birth.
- CE — Calving-Ease Score: 1= unassisted; 2= some assistance; 3=mechanical assistance.
- Adj. WW — Weaning weight adjusted to 205-days of age and adjusted for age of dam.
- Adj. YW — Yearling weight adjusted to 365-days of age and adjusted for age of dam.
- Weight Ratio — A direct comparison of one calf to all other calves in his contemporary group. 105 means that the calf performed 5% above group average for that trait and a 95 ratio indicates that the calf is 5% below group average for that trait.
- Contemporary Group — A group of cattle about the same age and given equal treatment.

Growth EPDs

- Birth Wt. EPD (BW) — Birth weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- Weaning Wt. EPD (WW) — Weaning weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- Yearling Wt. EPD (YW) — Yearling weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- Scrotal Circumference (SC) — Expressed in centimeters, this is a predictor of the difference in transmitting scrotal size compared to other animals from the same breed or database.

Maternal EPDs

- Maternal Milk (MM) — A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires.
- Milk & Growth (M&G) — A predictor of a sire's daughters for milk and growth. In other words, it is that part of a calf's weaning weight attributed to milk and genetics for growth.
- Udder Suspension and Teat Size — UDDER EPDs are reported on the scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. Higher number is more desirable.

Carcass EPDs

- Back Fat (Fat) — A predictor of the difference in external fat thickness at the 12th rib.
- Rib Eye Area (REA) — A predictor of the difference in ribeye area.
- Marbling (MARB) — A predictor of the difference in intramuscular fat.

Breed Indexes

- Baldy Maternal Index (BMI) — Combination of weighted traits that affect the bottom line when mating the Hereford bull on black cows.
- Calving Ease Index (CEZ) — Animal's potential for use on heifers.
- Brahman Influence Index (BI) — Similar to BMI index, but weighted heavier for traits that will make Brahman cattle more profitable.
- Certified Hereford Beef Index (CHB) — Animal's ability to perform in the feedlot and on the rail.

Ultrasound Adjusted Measurements

- Adj. % MARB — The percent intramuscular fat (marbling) adjusted to 365-days of age. Heritability for marbling is in the moderate range. The intramuscular fat in longissimus muscle of ribbed carcasses is the principal determinant of USDA quality grade in cattle slaughtered at less than 30-months of age. Heifers and steers in the 4% range of MARB will be close to making the Choice grade. Bulls if they were steers with a 3% MARB will also be close to the Choice grade. The difference is the influence of testosterone in the bulls' system.
- Adj. REA — Each bull's ribeye area measured in square inches and adjusted to one year of age. REA is used in the calculation of yield grade.
- Adj. Backfat — This is the backfat measured in inches adjusted to 365-days of age. The BF thickness is directly related to the carcass yield grade.
- Rib Eye/ cwt. — This is the adjusted REA divided by the hundred weight of the bull. The weight of the animal, which is affected by fill, body condition and others, can

change this ratio greatly.

Dam's and/or Progeny Production Records

- Birth Weight Ratio (BWR) — The number of calves a dam has had and their average birth wt. ratio. Example: 2-98 means the dam has had 2 calves with an average BWR of 98.
- Weaning Weight Ratio (WWR) — The number of calves a dam has had and their average weaning weight ratio. Example: 2-102 means the dam has had 2 calves with an average WWR of 102.
- Yearling Weight Ratio (YWR) — The number of calves a dam has had and their average yearling weight ratio. Example: 2-103 means the dam has had 2 calves with an average YWR of 103.
- Marbling Ratio (MARBR) — The number of calves a dam has had and their average wt. ratio. Example: 2-98 means the dam has had 2 calves with an average MARB of 98.
- Rib Eye Ratio (REAR) — The number of calves a dam has had and their average ratio. Example: 2-102 means the dam has had 2 calves with an average REA of 102.
- Fat Ratio (FATR) — The number of calves a dam has had and their average ratio. Example: 2-103 means the dam has had 2 calves with an average FAT of 103.
- DOB: Date of birth
- H/P/S/D: — Horned/Polled/Scurred/Dehorned

- The influence of Rib Eye in the Hereford breed grows with each year. The genetics that Rib Eye is passing on are trouble free, moneymaking traits that are being discovered by many commercial and seedstock breeders around the world.
- With 678 daughters in the national database, the new Udder and Teat EPDs rank him in the top 1% of the breed. In my mind, this proves he was "cool" before we had an EPD to prove it.
- Rib Eye is a breed trait leader in 13 different areas with 80% to 90% accuracies.
- Semen available through ABS.
- Rib Eye is deceased.

- Bartel has over a 15 in. REA and has over a 0.5 for IMF. That might be enough for a footnote, but wait, there's more: His mother is a full sister to herd sire Vision, working for Rausches, and Bartel has a low 0.4 BW EPD. That ranks him in the top 10% of the breed for that trait also. Want more? Come look at him.

- If you want moderate framed replacement females with good udder volume and small teats, buy this bull.
- This bull was too young at the scanning date to ratio. Actual REA 12.60 sq. in., IMF 3.57 and BF 0.33.

A few notes about the registered cows selling.

- We are selling all the 5-year-old cows that have been ultrasound checked to be carrying a heifer calf.
- I feel we can offer a no-holes, predictable female package with many future productive years.

The thinking behind this program is:

1. We will be keeping all of our registered heifer calves, thus we can turn our generations faster in the cow herd.
2. We will have time to identify the donors, flush embryos and use the genetics from these cows for our future, then offer them to you.
3. By selling cows with heifer calves, we can have some stability in our cow herd and gather data on the bulls for the following year's sale.
4. We will identify the bottom end of the cows and cull for any reason necessary.
5. These cows will sell with complete performance and ultrasound records.
6. We will be giving you the opportunity to purchase the very top end of these young cows.

- Exposed Dec. 2, 2014 to Feb. 1, 2015, to SHF All Star A191.

Real World Proof!

Kevin,

We were very pleased with the quality and fertility we had with the baldie heifers we purchased at your sale last year. 100% of the 15 heifers bred and we appreciated their ease of handling, not to mention their eye appeal.

Needless to say we will be back to your sale again next year.

Mike & Shelly McGregor
Monticello, Arkansas

SANDHILL FARMS COMMERCIAL HEIFERS

These commercial Hereford heifers are out of the heart of our commercial herd. Our commercial Hereford herd was started in the mid-1940s by my grandfather, Roy Schultz and continued by Dad, Ron Schultz.

We are happy to have a group of black baldie heifers from one of our long time customers, /EV Ranch from Rifle, Colorado. These are younger than ours, about 1 to 2 months, and were raised in the western edge of Colorado. The genetics in these heifers is a combination of SHF and GAR, Gardiner Angus Ranch, from Ashland.

/EV Ranch is a 70-year-old ranch in Northwestern Colorado near the town of Meeker and has been focused on raising the highest quality, commercially-bred black baldie replacement heifers since 1986. The ranch has 1,000 commercial cows and utilizes Sandhill Farms Hereford and Gardiner Angus.

Bulls with low BW, high growth and moderate frame EPDs. The ranch offers approximately 150 baldie replacements per year. The set of 15 present is a top sort of this 150 and additional heifers are available at the ranch via private treaty.

For more information, please contact Ty Schultz 425-749-1007.
