

Reliable Source for Performance Herefords!

Sandhill  
Farms

*Unlock Their Future Potential  
With Genetically Enhanced EPD's*

**April 1, 2016 - 1 p.m.**

***Selling 120 Bulls and 20 Proven Females***

**Also Selling 60 Commercial Hereford  
and Black Baldie Open Heifers**

Visit [sandhillfarms.com](http://sandhillfarms.com) or call (620)995-4072 for information on  
sale cattle and videos of the sale bulls.

# Real World Proof!

In searching to crossbreed our mostly black based cowherd, we have used a couple different breeds. I have found that cross breeding with SHF genetics has given me some very good heterosis. I have compared SHF genetics with other breeds in the feedlot and the SHF bulls have returned more net dollars into my pocket. This was based on looking at the feeding close out data and end product value when we sold them on a value based grid.

*Clawson Ranch  
Englewood, Ks*

## **Repeat Buyer Credit Policy**

We offer a "repeat buyer credit policy". If you purchased a registered animal from us in last years sale, you will receive 5% off your total purchase in this years' sale.

*This policy will be ongoing and will apply to next years sale. The discount is determined after all credits have been subtracted from the gross purchase price.*

[www.sandhillfarms.com](http://www.sandhillfarms.com)

Dear Friends,

We would be honored to have you with us for our April 1st production sale. Our family has changed a great deal from last year. On June 9<sup>th</sup>, Brooke and Travis had a little girl, Adriel Joy Warner. I have to admit, putting together this catalog has taken a back seat to spending time with her.

I recently received an email from David Ranch near Lenora Ks., in it, they showed the SHF sired steers graded 100% choice, and had the same 54% CAB qualifiers as the solid black steers. Their reason for using SHF bulls was the maternal traits. This data shows we can provide both.

This year we have an exciting offering of bulls. The sale will feature several new sire groups which will be intriguing for both new and past customers.

There are more tools for breeding and developing cattle available all the time. Of recent, the American Hereford Assoc. has added EPDs for *Heifer Calving Rate (Fertility)* and *Sustained Cow Fertility (Longevity)*. Currently only reference sires have these EPDs. In studying the five herd sires that make up our base herd genetics, KCF Bennett 3008 M326, SHF Progress P20, SHF Wonder M326 W18, SHF Interstate D03 and SHF Rib Eye R117 their average ranks them in the:

- Top 16% of the breed for Heifer Calving Rate
- Top 19% for Sustained Cow Fertility

Basically, this shows the benefits of our rigid culling and breeding program.

We would like to have more feedback from you. In order to do this, we are now going to offer \$50 credit for copies of your feedlot close out data or carcass settlements. It is our intent to gather this information for us to glean strength and weaknesses so we can provide you a better product.

We want to remind you we stand behind everything we sell. We have, and always will, offer a one year complete warranty on the bulls. Soundness, disposition and fertility it is all guaranteed.

We want to make each set of cattle we sell better every year. We stress Calving Ease, Performance, Carcass Merit and Udder Quality.

Sincerely,

Kevin and Tyler Schultz

# Sandhill Farms Production Sale

Friday, April 1, 2016 • At the Ranch • 1 p.m. (CST)

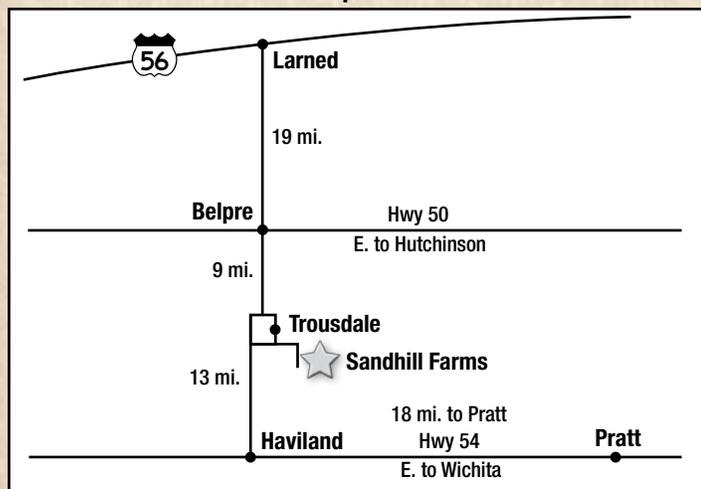

2048 280th Ave. • Haviland, KS 67059

Kevin and Vera Schultz 620-995-4072 • Kevin cell 620-546-4570 • Tyler Cell 620-546-1574

Ron and Arnita Schultz 620-348-4863 • Vera cell 620-546-3982

[www.sandhillfarms.com](http://www.sandhillfarms.com) • [kevin@sandhillfarms.com](mailto:kevin@sandhillfarms.com)

Cattle will sell in lot order.  
Located near Trousdale. See map.

**Inspection of cattle:** The cattle will be available for inspection any time prior to sale at Sandhill Farms.

Serving beef stew Thursday night. A complimentary lunch will be available on sale day along with donuts and coffee on Friday morning.

**Note:** Sandhill Farms reserves the right to a ¼ semen interest on all sale bulls with the exception of a ½ semen interest in Lots 1,2,3,5,6, 7 and 19. These bulls will be marked.

All of the lots in the sale will also be available for viewing online prior to sale day at [www.superiorlivestock.com](http://www.superiorlivestock.com) and [www.sandhillfarms.com](http://www.sandhillfarms.com)

## Terms and Conditions

**Delivery:** Free delivery on registered bulls and cows to central points in the U.S. \$75 off per bull you haul. No delivery on the heifers.

**Guarantee:** We guarantee that all breeding cattle, both females and bulls, are fertile to the best of our knowledge. If they are injured any time in the 12 months after they are purchased so as to make them functionally infertile, we will provide you with a satisfactory replacement, if available, or issue you credit equal to your purchase minus salvage value.

**Sight Unseen Guarantee:** Just like when we sold bulls private treaty, we will guarantee your satisfaction of the bulls we purchase for you. If you don't feel like the bull was represented accurately after he has been at your place, let us know and all you will pay is the trucking. We will take the bull back. You must talk to us at Sandhill Farms so we can help match you up with the best bulls for you prior to the sale.

**Health:** All bulls have been fertility tested by Dr. Mike Burdett of Larned Veterinary Clinic and passed. They were also vaccinated with Staybred VL5 and poured with ivermectin. All cattle have been tested negative for PI BVD. At weaning, the bulls and heifers were vaccinated and boosted with Bovishield Gold 5,

## Special Comments

Levi Landers with the American Hereford Association has seen all the cattle. He can take phone bids or advise about the cattle.

Inclement weather: check our Web site [www.sandhillfarms.com](http://www.sandhillfarms.com) for weather postponements.

## Accommodations

<i>Pratt, 30 miles southeast from Sandhill Farms</i>	
Days Inn -----	620-672-9465
Holiday Inn Express -----	620-508-6350
<i>Larned, 30 miles north of Sandhill Farms</i>	
Best Western -----	620-285-3114
Rodeway Inn -----	620-285-2300

## Air Travel

Wichita is located 100 miles east of Sandhill Farms and is served by major airline carriers. Dodge City is located 60 miles west of Sandhill Farms and is a regional airport.

**Prerponse SQ and Vision 7.** The heifers were vaccinated with Bovishield Gold FP 5 VL5 and poured with ivermectin. Herd health is excellent. Individual health papers will be provided for shipment anywhere.

**Bull Development:** The bulls were creep fed on grass in late summer. After weaning, they have been grazing on wheat or annual rye pasture when available. Silage and 8 lb. of grain have also been fed.

**Announcements:** Check our Web site for updated information at [www.sandhillfarms.com](http://www.sandhillfarms.com).

**Liability:** Any person attending the sale does so at his own risk. The sale management, owners nor any person connected with this sale do not assume any liability, legal or otherwise.

**Registrations/Transfers:** Registration certificates will be transferred to the buyer upon request at the seller's expense. When making settlement, buyers must give complete written name and address.

**Insurance:** Insurance will be available sale day for those wishing to purchase it. Please tell the clerk when settling up. Sheila Jensen, Livestock Insurance Agent 785-374-4372.

# Glossary of Performance Terms

We are going to give you all the data we can gather and let you decide which bulls will fit in your program the best.

- Expected Progeny Difference (EPD) — The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed from the same database. EPDs are expressed in units of measure for the trait, plus or minus. EPDs are not to be compared between breeds.
- ACC — Accuracy is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability.
- Birth wt. — The actual weight in pounds at birth.
- CE — Calving-Ease Score: 1= unassisted; 2= some assistance; 3=mechanical assistance.
- Adj. WW — Weaning weight adjusted to 205-days of age and adjusted for age of dam.
- Adj. YW — Yearling weight adjusted to 365-days of age and adjusted for age of dam.
- Weight Ratio — A direct comparison of one calf to all other calves in his contemporary group. 105 means that the calf performed 5% above group average for that trait and a 95 ratio indicates that the calf is 5% below group average for that trait.
- Contemporary Group — A group of cattle about the same age and given equal treatment.

## Growth EPDs

- Birth Wt. EPD (BW) — Birth weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- Weaning Wt. EPD (WW) — Weaning weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- Yearling Wt. EPD (YW) — Yearling weight of animal's progeny expected difference as compared to other animals from the same breed or database.
- Scrotal Circumference (SC) — Expressed in centimeters, this is a predictor of the difference in transmitting scrotal size compared to other animals from the same breed or database.

## Maternal EPDs

- Maternal Milk (MM) — A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires.
- Milk & Growth (M&G) — A predictor of a sire's daughters for milk and growth. In other words, it is that part of a calf's weaning weight attributed to milk and genetics for growth.
- Udder Suspension and Teat Size — UDDR EPDs are reported on the scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. Higher number is more desirable.

## Carcass EPDs

- Back Fat (Fat) — A predictor of the difference in external fat thickness at the 12th rib.
- Rib Eye Area (REA) — A predictor of the difference in ribeye area.
- Marbling (MARB) — A predictor of the difference in intramuscular fat.

## Breed Indexes

- Baldy Maternal Index (BMI) — Combination of weighted traits that affect the bottom line when mating the Hereford bull on black cows.
- Calving Ease Index (CEZ) — Animal's potential for use on heifers.
- Brahman Influence Index (BI) — Similar to BMI index, but weighted heavier for traits that will make Brahman cattle more profitable.
- Certified Hereford Beef Index (CHB) — Animal's ability to perform in the feedlot and on the rail.

## Ultrasound Adjusted Measurements

- Adj. % MARB — The percent intramuscular fat (marbling) adjusted to 365-days of age. Heritability for marbling is in the moderate range. The intramuscular fat in longissimus muscle of ribbed carcasses is the principal determinant of USDA quality grade in cattle slaughtered at less than 30-months of age. Heifers and steers in the 4% range of MARB will be close to making the Choice grade. Bulls if they were steers with a 3% MARB will also be close to the Choice grade. The difference is the influence of testosterone in the bulls' system.
- Adj. REA — Each bull's ribeye area measured in square inches and adjusted to one year of age. REA is used in the calculation of yield grade.
- Adj. Backfat — This is the backfat measured in inches adjusted to 365-days of age. The BF thickness is directly related to the carcass yield grade.
- Rib Eye/ cwt. — This is the adjusted REA divided by the hundred weight of the bull. The weight of the animal, which is affected by fill, body condition and others, can

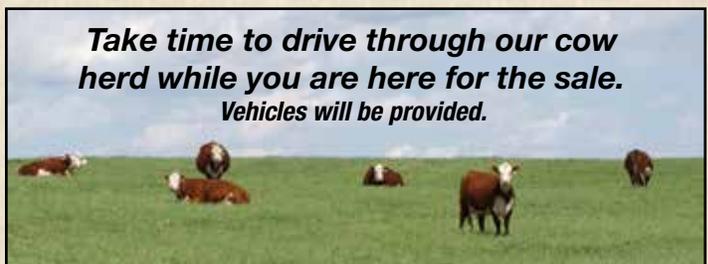

change this ratio greatly.

## Dam's and/or Progeny Production Records

- Birth Weight Ratio (BWR) — The number of calves a dam has had and their average birth wt. ratio. Example: 2-98 means the dam has had 2 calves with an average BWR of 98.
- Weaning Weight Ratio (WWR) — The number of calves a dam has had and their average weaning weight ratio. Example: 2-102 means the dam has had 2 calves with an average WWR of 102.
- Yearling Weight Ratio (YWR) — The number of calves a dam has had and their average yearling weight ratio. Example: 2-103 means the dam has had 2 calves with an average YWR of 103.
- Marbling Ratio (MARBR) — The number of calves a dam has had and their average wt. ratio. Example: 2-98 means the dam has had 2 calves with an average MARB of 98.
- Rib Eye Ratio (REAR) — The number of calves a dam has had and their average ratio. Example: 2-102 means the dam has had 2 calves with an average REA of 102.
- Fat Ratio (FATR) — The number of calves a dam has had and their average ratio. Example: 2-103 means the dam has had 2 calves with an average FAT of 103.
- DOB: Date of birth
- H/P/S/D: — Horned/Polled/Scurred/Dehorned

**SHF Rib Eye M326 R117**

- The influence of Rib Eye in the Hereford breed grows with each year. The genetics that Rib Eye is passing on are trouble free, money making traits that are being discovered by many commercial and seedstock breeders around the world.
- With 727 daughters in the national database, the UDDR and TEAT EPDs rank him in the top 1% of the breed. In my mind, this proves he was "cool" before we had an EPD to prove it.
- Rib Eye is a breed trait leader in 12 different areas with 80 to 90% accuracies.
- Semen available through ABS.
- Rib Eye is deceased.

**W46 — Daughter of Rib Eye**

**SHF Wonder M326 W18 ET**

- Wonder is siring some of the most popular cattle in the breed. From grading 100% choice at the Olsen test to siring champions in both North and South America.
- Wonder's influence runs deep in our program. We are using sons, daughters and many of their offspring.
- Forty-one of the bulls in the sale trace back to Wonder and four direct sons sell.
- Wonder is deceased and no semen is available.

**W04 — Full sister to Wonder**

- Here comes Conqueror. He has one of the best carcass profiles in the offering. He is in the top 1% for IMF and top 10% for REA. Combine that with a top 4% of the breed for CEZ\$ Index and we have a true elite breeding tool. Add in that he is a son of Manning and out of a close to perfect uddered dam. She sells as Lot 121. Member of our Denver pen.
- Conqueror sells already in a lease agreement with Sexing Technologies. You will have the unique opportunity to purchase this bull knowing the marketing and semen sales will be handled by the stud. Sexing Technologies will be selling both male- and female-sorted semen as well as non-sorted. Contact us for details.
- Selling full possession after the bull comes out of collection and ½ semen royalty.
- Conqueror is in stud collecting semen and will not be at the sale.

0.43-100	13.53-100	1.06	4.02	100	36.30	4	3/107	2/106	1/111		

- The grandam of Captain is the Larry Bird cow, the sire of dam is Tahoe. Combine that with the genetics of Z210 and the results are pretty awesome. He ranks in the top 1% of the breed for IMF and is very balanced for calving ease, growth, teat and udder, and carcass. An all-around combination bull. Maternal brother sells as Lot 74. Member of our Denver pen.
- Selling full possession, ½ semen interest.

Lot 3 —

0.53-115	13.49-100	1.06	4.37	104	38.70	4	3/106	3/112	3/105		

- Cannon is a maternal brother to the high selling bull in our sale two years ago, Access. He was purchased by Oschner in Wyoming and Goering in Iowa, then Hoffman and Genex bought an interest. I really like this bull and feel he is just as impressive a genetic package as his famous brother. Balanced growth, carcass and maternal.
- Selling full possession, ½ semen interest.

**We are offering you a \$50 credit for your feedlot and carcass data.**

**The more we learn about the progeny of the bulls, the more we can improve our product and in turn make you a bigger return on your investment.**

**Therefore, anytime you have a feedyard close out, or carcass report, send us a copy and we will credit you \$50 for any future purchase.**

• We have several full sisters to the dam of this bull. I don't know which one I like the best. They are all feminine, good uddered and full of carcass value. This son of All Star will make progeny you will be proud of and your banker will like them too.

• The dam of C149, U75, has as good and functional of an udder as any cowman would design. Add to that, the top 3% for BW and calving ease, you might not need much else. But then again, the 1,200+ lb. yearling weight comes in handy.

- We used X194 as a donor due to her udder quality, performance and cow family. We flushed her to 0424, as we saw some very good daughters in production. This bull, Compel, ranks in the top 1% of the breed for BMI\$ and BIIS. These Indexes suggest the females will be maternal and good replacements. Maternal brothers sell as Lots 27, 67 and 75.

• This Anodyne son is a low BW, negative BW EPD calving ease bull. He ranks in the top 2% for CEZ\$ Index.

## A few notes about the registered cows selling.

- We are selling all the 5-year-old cows that have been ultrasound checked to be carrying a heifer calf.
- I feel we can offer a no-holes, predictable female package with many future productive years.

### The thinking behind this program is:

1. We will be keeping all of our registered heifer calves, thus we can turn our generations faster in the cow herd.
2. We will have time to identify the donors, flush embryos and use the genetics from these cows for our future, then offer them to you.
3. By selling cows with heifer calves, we can have some stability in our cow herd and gather data on the bulls for the following year's sale.
4. We will identify the bottom end of the cows and cull for any reason necessary.
5. These cows will sell with complete performance and ultrasound records.
6. We will be giving you the opportunity to purchase the very top end of these young cows.

Over the past few years, the American Hereford Association (AHA) has worked with Hereford breeders and the scientific community to develop and incorporate Genomic information into Pan American Cattle Evaluation (PACE) to enhance the predictive power of EPD. Genomic Enhanced EPD (GE-EPD) allow commercial and seedstock producers the opportunity to make selections and mating decisions based on the most current and accurate information on Hereford Genetics. The current AHA test is a Low Density (LD) panel that was built off of a High Density (HD) panel and training was done utilizing high accuracy Hereford sires. Each animal that is tested has an updated set of EPD and corresponding accuracy. The AHA currently has over 25,000 animals genotyped. For some traits, the added accuracy will increase by a 100% and moving from .15 to over .30 which means you would be adding from 5-10 progeny to a pedigree before an animal has any progeny analyzed (table below). The use of this information reduces your risk when buying, and helps to plan matings based off of all information available.

**Each animal tested is recognized with the AHA GE-EPD logo.**

Lot 120 — SHF Oksana 33T Y59

- Y59 will cause more of a stir when she leaves than about any cow we have ever sold. Phenotype, she's got it. Performance, she carries a 97 BW ratio and 110 WW ratio. Carcass, she has a top 1% of the breed for IMF and top 25% for REA. Cow family, her dam is one of our long time donors that has had sons leading past sales. Good luck owning her, as she has been an awesome cow for us and will be for you. Y59 has been flushed two times and averaged seven embryos.
- Will calve prior to sale day to Gerber Anodyne 001A.

- Calved Feb. 14, 2016. Heifer calf by SHF Rib Eye M326 R117, tattoo D91.

# SANDHILL FARMS COMMERCIAL HEIFERS

These commercial Hereford heifers are out of the heart of our commercial herd. Our commercial Hereford herd was started in the mid-1940s by my grandfather, Roy Schultz and continued by Dad, Ron Schultz.

We are happy to have a group of black baldie heifers from one of our long time customers, /EV Ranch from Rifle, Colorado. These are younger than ours, about 1 to 2 months, and were raised in the western edge of Colorado. The genetics in these heifers is a combination of SHF and GAR, Gardiner Angus Ranch, from Ashland.

/EV Ranch is a 70-year-old ranch in Northwestern Colorado near the town of Meeker and has been focused on raising the highest quality, commercially-bred black baldie replacement heifers since 1986. The ranch has 1,000 commercial cows and utilizes Sandhill Farms Hereford and Gardiner Angus.

Bulls with low BW, high growth and moderate frame EPDs. The ranch offers approximately 150 baldie replacements per year. The set of 15 present is a top sort of this 150 and additional heifers are available at the ranch via private treaty.

For more information, please contact Ty Schultz 425-749-1007.

# Real World Proof!

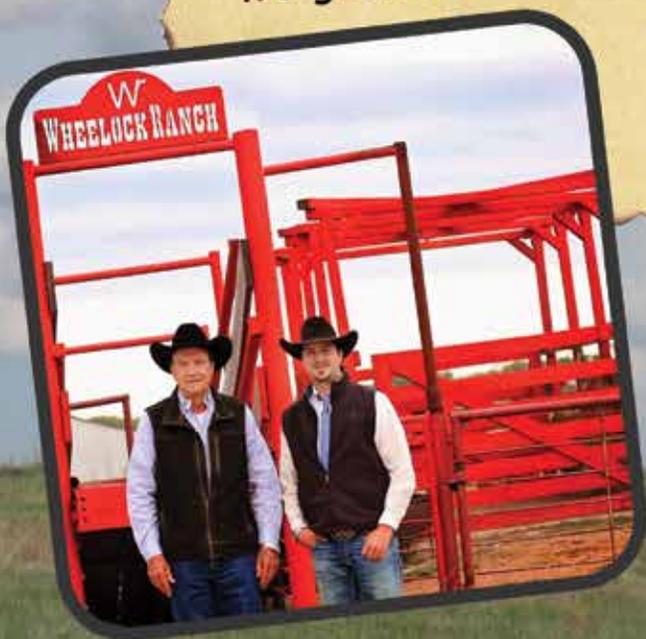

For us, the decision to phase into Sandhill bulls 4 years ago was easy. You can't beat the opportunity to add nationally recognized genetics to your herd. We require low maintenance, easy calving, and efficient growth. We breed several hundred cows in the fall and spring and market the calves and/or yearlings locally. In addition, we breed several hundred heifers to keep or sell private treaty to local producers.

This past fall at weaning we had the heaviest calves ever due to SHF genetics.

Whether you're selling to your neighbors, or retaining your stock, you've got to have consistent quality. We run black and red Angus females crossed with these polled Herefords. The extra growth in this cross is the only free lunch in the industry.
